CJIS Tracker — security-review flow

Current SPRINT-007 prototype. Entra / City SSO is not on this path. The PIN is not a lock on the stores. 21 Oct 2026.

Review takeaway. Anyone on that Windows profile can read localStorage without the PIN. Anyone who can reach port 8741 can read or replace the SQL copy. DEC-015 Entra login is not in the flow. This chart does not satisfy G-SEC.

Step	Control today
Staff → Browser	OS login to the PC. No app authentication server.
Browser PIN	Chooses Read Only / Records / Admin screens. Does not encrypt data.
localStorage	Always written. Full record set + access codes, plaintext.
API → SQL	Optional. Unauthenticated GET/PUT of every non-deleted row.

Does not satisfy G-SEC. Companion reviews: SQL-backend and local-only canvases.
